

WashU Epigenome Browser - Bug # 105

Status:	Rejected	Priority:	Normal
Author:	Daofeng Li	Category:	
Created:	11/17/2013	Assignee:	
Updated:	11/18/2013	Due date:	
Subject:	'Remove all' button in Facet of public hub was not working		
Description			
<ul style="list-style-type: none">- after loading one the public hub- try to remove all tracks (native or tacks from hub)- the two 'Remove all' buttons don't work well (part of tracks removed, remaining tracks could not be removed)

- Status changed from New to Rejected

that's not an issue, that's a feature

One REMOVE ALL button controls the native tracks and will remove all native tracks when clicked

When you load a datahub with metadata, a new REMOVE ALL button is created that will only remove tracks from that hub (or annotated with the given metadata vocabulary) when clicked
