<b>Subject:</b>	Error in SE paper datahub		
<b>Description</b>			
<p>I get the following error when I load the SE project datahub:</p> <p>track MeDIP of BreMyo has unknown term id (HS2294) for mdkey track methylCRF of BreMyo has unknown term id (Myoepithelia) for mdkey</p> <p>My copy of the hub is here: <a href="https://cgs.wustl.edu/~rlowdon/seWebpageHub.json">https://cgs.wustl.edu/~rlowdon/seWebpageHub.json</a></p> <p>There are no errors on the SE project web page: <a href="http://epigenome.wustl.edu/SE/visual.php">http://epigenome.wustl.edu/SE/visual.php</a> But when I go to the Skin-DMR page and click the first link to the EpiGenome browser I get the same error (see image).</p> <p>I hope this is an easy fix! The paper should be published soon.</p>

<p>Sorry for this error and it have been fixed.</p> <p>You can update your hub using this link <a href="http://epigenome.wustl.edu/SE/hub">http://epigenome.wustl.edu/SE/hub</a> which used the new shared metadata system.</p> <p>Let me know if there is additional errors, thanks!</p>
