**Subject:** Error in SE paper datahub

### Description

I get the following error when I load the SE project datahub:

track MeDIP of BreMyo has unknown term id (HS2294) for mdkey  
track methylCRF of BreMyo has unknown term id (Myoepithelia) for mdkey

My copy of the hub is here: <https://cgs.wustl.edu/~rldon/seWebpageHub.json>

There are no errors on the SE project web page: <http://epigenome.wustl.edu/SE/visual.php>  
But when I go to the Skin-DMR page and click the first link to the EpiGenome browser I get the same error (see image).

I hope this is an easy fix! The paper should be published soon.

Sorry for this error and it have been fixed.

You can update your hub using this link <http://epigenome.wustl.edu/SE/hub> which used the new shared metadata system.

Let me know if there is additional errors, thanks!
