<b>Subject:</b>	Multiple upload of custom tracks		
<b>Description</b>			
<p>Would be nice to be able to submit multiple URLs to load several custom tracks at once (in a single interface -- for example, I have 4 bigWig files I want to upload). Users who aren't sophisticated enough to write their own data hub would appreciate this a lot I think. Also it would be nice for power users who just want to look at a few (more than 1) new dataset quickly, but maybe don't know if it is worth writing up a data hub yet if it is test data or something.</p>
