Updated:	05/25/2014	**Due date:**	
Subject:	long range track display weird in SVG output		
Description			

- noticed this issue before, but could be solved by using PDF files instead
- currently a people mailed our list, he insist using SVG files for further editing
- the SVG display in Illustrator or inkscape shown in picture attached, instead of purple lines, displaying black areas....

History

#1 - 10/06/2013 03:14 pm - Xin Zhou

SVG output function has been updated in v24.2, please see if this problem is still there. Also please do extensive test on the SVG output function. Thanks!

#2 - 10/06/2013 03:15 pm - Xin Zhou

- *Status changed from New to Resolved*

#3 - 10/07/2013 08:57 am - Daofeng Li

- *File original.png added*
- *File open_in_inkscape.png added*
- *File open_in_illustrator.png added*

- seems still get abnormal output when open in inscape or illustrator
- please see screenshot below

#4 - 10/09/2013 02:59 pm - Daofeng Li

- *File Screen shot 2013-10-09 at 2.53.26 PM.png added*

- in V24.3, seems the arc still get black area when opened with illustrator or inkscape
