Subject:	general suggestions from UCSF		

Description

(comments from Gormley, Matthew at UCSF)

*feedback window at upper right is too close to toolbar, relocate or remove

*need easy way to clear all tracks (make blank canvas)

*more interactive track names on left, such as shift-clicking and control-clicking to select several tracks at once

*the svg export files lacks track names

*The clickable matrix in the UCSC browser is very nice. Can this be incorporated in WashU browser in a similar fashion, or when returning search results?
