Subject:	Improve session?		
Description			
<p>(comments from Gormley, Matthew at UCSF)</p> <p>-saving a session is only useful if you remember to record the session ID. place a cookie? have users login? send an email?</p> <p>when returning to a saved session, the graphical display of data changes to a "heat map" like display (instead of mountains), and the colored metadata columns on right are lost.</p>
