Subject:	[System] killing subtleKnife process which had been stucked longer than 10min		
Description			

- did some research, finally choose to achieve this by using the killall command
- adding cron jobs to epgg1,2,3, automatically kill every 30min

  0/30 * * * * killall --older-than 10m subtleKnife

- Testing: the sleep was running for 18min, and was been killed by our command example

  dli@sandbox1:~$ ps -eo pid,etime,comm,user,tty | grep sleep
  28890   18:05 sleep   dli   pts/26
  dli@sandbox1:~$ killall --older-than 10m sleep
  dli@sandbox1:~$ ps -eo pid,etime,comm,user,tty | grep sleep
  dli@sandbox1:~$
