- Status changed from New to In Progress

better error handling implemented in v24.1. When a broken track is used, the browser should not crash but print out a warning message instead.

This applies to both native and custom tracks.

Please test it on all places that involves adding tracks. Thanks!

#2 - 04/08/2014 01:14 pm - Xin Zhou  
- Status changed from In Progress to Resolved

Broken track URL of all types (not limited to bedgraph or bigwig) can be handled from v36.0.4
