| **Subject:** | crashed when restoring session | | |
| **Description** | | | |

this happens to sessions that were created a while ago, before September 2013.

## History

*- Status changed from New to Resolved*

Solved by allowing the code to tolerate the non-existent tracks and wrong metadata color map term information.

In the recent update all the Roadmap HMM tracks were replaced as well as their track name. So past sessions with old track name would crash the system! Now this is resolved.
