Safari 5 navigation display disorder																												
gene set list in hub support url																												
ability to cancel a super-enhancer job																												
Line plot																												
public datahub unload button?																												
operation history																												
Quick capture of the central canvas																												
add time information for session and status																												
bam track (full) view range limit																												
batch GEO id output																												
Coordinate issue in hg19																												
automatically refresh cache																												
general suggestions from UCSF																												
Improve session?																												
Improve gene search function																												
Improve gene set view																												
[System] killing subtleKnife process which (...)																												
"donor" terms in hg19 metadata																												
track background color not applied on 2nd (...)																												
2nd panel lineplot not applied to main panel																												
browser background color																												
session with lineplot TypeError																												
user defined track color																												
function that move track(s) to top or bottom																												
compute pearson correlation in scatterplot																												
hub check button																												
Tracks disappear when using config panel																												

tracks do not relocate and some disappear (...)
add track name to genome snapshot
search auto completion by right clicking (...)
Track configuration on ipad
adjust track order in genome snapshot
Session cannot save more than 1 custom metadata (...)
refSeq gene position didn't keep in session
wrapping for tooltip read information
Include scaffolds on genome snapshot
long responsive time while track missed in (...)
'pack and hide' status not saved in session
refGene track automatically be put to bottom (...)
MCM (metadata colormap) shows blank when (...)
geneplot on methylC track
Json syntax error when trying to jump to (...)
juxtaposition issue on genome align tracks
refresh cache issue
gene set view not working
missing 0% methylated CpG display in methylC (...)
load hub and session issue
Matplot not working with sessions
dbSNP track crashes
Error in SE paper datahub
Gene shading feature inconsistent and needs (...)
Roadmap analysis hub crashes
Potential bug in the json hub name?
zooming in on a genomic region doesn't give (...)
can't zoom out in gene set view in mm9
Please add the option to remove genome comparison (...)
Incorrect SNP coordinate based on SNP ID
Pop-up window for confirming zooming in on (...)
Missing display of 0% methylated Cs in methylC (...)
Change names of custom tracks
Multiple upload of custom tracks

Custom track can not be submitted again after (...) track hub include feature slow loading of big hub json syntax error when loading genome comparison (...) Complete Epigenome Browser WUGB popup link get blocked
