Safari 5 navigation display disorder																						
gene set list in hub support url																						
ability to cancel a super-enhancer job																						
Line plot																						
public datahub unload button?																						
operation history																						
Quick capture of the central canvas																						
add time information for session and status																						
bam track (full) view range limit																						
batch GEO id output																						
Coordinate issue in hg19																						
automatically refresh cache																						
general suggestions from UCSF																						
Improve session?																						
Improve gene search function																						
Improve gene set view																						
[System] killing subtleKnife process which ()																						
"donor" terms in hg19 metadata																						
track background color not applied on 2nd ()																						
2nd panel lineplot not applied to main panel																						
browser background color																						
session with lineplot TypeError																						
user defined track color																						
function that move track(s) to top or bottom																						
compute pearson correlation in scatterplot																						
hub check button																						
Tracks disappear when using config panel																						

05/19/2024

tracks do not relocate and some disappear (...) add track name to genome snapshot search auto completion by right clicking (...) Track configuration on ipad adjust track order in genome snapshot Session cannot save more than 1 custom metadata (...) refSeg gene position didn't keep in session wrapping for tooltip read information Include scaffolds on genome snapshot long responsive time while track missed in (...) 'pack and hide' status not saved in session refGene track automatically be put to bottom (...) MCM (metadata colormap) shows blank when (...) geneplot on methylC track Json syntax error when trying to jump to (...) juxtaposition issue on genome align tracks refresh cache issue gene set view not working missing 0% methylated CpG display in methylC (...) load hub and session issue Matplot not working with sessions dbSNP track crashes Error in SE paper datahub Gene shading feature inconsistent and needs (...) Roadmap analysis hub crashes Potential bug in the ison hub name? zooming in on a genomic region doesn't give (...) can't zoom out in gene set view in mm9 Please add the option to remove genome comparison (...) Incorrect SNP coordinate based on SNP ID Pop-up window for confirming zooming in on (...) Missing display of 0% methylated Cs in methylC (...) Change names of custom tracks

Multiple upload of custom tracks
