Safari 5 navigation display disorder																									
gene set list in hub support url																									
ability to cancel a super-enhancer job																									
Line plot																									
public datahub unload button?																									
operation history																									
Quick capture of the central canvas																									
add time information for session and status																									
bam track (full) view range limit																									
batch GEO id output																									
Coordinate issue in hg19																									
automatically refresh cache																									
general suggestions from UCSF																									
Improve session?																									
Improve gene search function																									
Improve gene set view																									
[System] killing subtleKnife process which (...)																									
"donor" terms in hg19 metadata																									
track background color not applied on 2nd (...)																									
2nd panel lineplot not applied to main panel																									
browser background color																									
session with lineplot TypeError																									
user defined track color																									
function that move track(s) to top or bottom																									
compute pearson correlation in scatterplot																									
hub check button																									
Tracks disappear when using config panel																									

tracks do not relocate and some disappear (...)
add track name to genome snapshot
search auto completion by right clicking (...)
Track configuration on ipad
adjust track order in genome snapshot
Session cannot save more than 1 custom metadata (...)
refSeq gene position didn't keep in session
wrapping for tooltip read information
Include scaffolds on genome snapshot
long responsive time while track missed in (...)
'pack and hide' status not saved in session
refGene track automatically be put to bottom (...)
MCM (metadata colormap) shows blank when (...)
geneplot on methylC track
Json syntax error when trying to jump to (...)
juxtaposition issue on genome align tracks
refresh cache issue
gene set view not working
missing 0% methylated CpG display in methylC (...)
load hub and session issue
Matplot not working with sessions
dbSNP track crashes
Error in SE paper datahub
Gene shading feature inconsistent and needs (...)
Roadmap analysis hub crashes
Potential bug in the json hub name?
zooming in on a genomic region doesn't give (...)
can't zoom out in gene set view in mm9
Please add the option to remove genome comparison (...)
Incorrect SNP coordinate based on SNP ID
Pop-up window for confirming zooming in on (...)
Missing display of 0% methylated Cs in methylC (...)
Change names of custom tracks
Multiple upload of custom tracks

Custom track can not be submitted again after (...) track hub include feature slow loading of big hub json syntax error when loading genome comparison (...) Complete Epigenome Browser WUGB popup link get blocked
